*Excellent employer

GEORG is one of the top employers of medium-sized companies in Germany, Austria and Switzerland. This is the result of a study conducted by Focus-Business in cooperation with kununu.com, the employer rating portal for employees, trainees and applicants, in 2018.

According to this survey, GEORG ranks among the 1,300 most popular medium-sized employers in the German-speaking region and ranks third among medium-sized mechanical engineers in the DACH region.

In the 2019 study, which evaluated a total of 750,000 companies in Germany, GEORG ranked fifth among the most popular medium-sized machine and plant manufacturers.

Why is GEORG so popular?

Our team particularly appreciates the employee-oriented corporate culture with flat hierarchies and agile work. We regard our employees in their entirety as people who are integrated in professional and private networks.

We offer them excellent opportunities for further education and training, for example in our in-house academy. Flexible working hours, a company kindergarden, a parent-child office, a care and advice hotline and numerous other support services for the whole family are just a few examples of the fact that we really focus on people.
