Working & living

Technical Globetrotters (m/f/d)

As the world market leader in mechanical and plant engineering and an awarded employer with excellent working conditions, we are looking for technical globetrotters (m/f/d) to put our machines and plants into operation and maintain them for our international customers. What you should bring along are openness and curiosity about other countries and cultures.

In order to gain new perspectives, you have to change position.

Are you a technical specialist in mechanical engineering and/or electronics - or are you well on your way to becoming one - and want to give your professional development new impetus? Would you like to travel the world, but keep the center of your life at home? And are you looking for an authentic travel guide who prepares you well for this challenging task and offers you fair conditions?

No matter whether you join us as a

- > construction site manager
- > commissioning engineer
- > service engineer or
- > field fitter
- > application engineer
- > service technician

you will always be the focus of our attention. Find out more about our company, our special culture and our diverse services for our employees. Use your chance for a change. And apply now!

“Nowhere have I learned as much as on my travels. GEORG really appreciates my commitment. That’s what my family and I like.”

Alexander Zhen, Service Technician
